

Photocathode Physics for Photoinjectors 2012

Monday, October 8, 2012 - Wednesday, October 10, 2012

Clark Hall

Book of Abstracts

Contents

Workshop Welcome	1
Review of recent European Cathode Workshop	1
Review of recent U Chicago photocathode/detector workshop	1
Memories of the previous P3 workshop	1
Measurements of transverse momentum of photoelectrons from metals and alkali antimonide semiconductors	1
Measuring the growth of alkali antimonides using in-situ XRD and x-ray reflectivity	1
Open Discussion or Contributed Talks	1
Measurement of the chemistry and growth of alkali antimonides using in-situ AFM and XPS	1
Fabrication, characterization and use of alkali antimonides in a dc gun	2
MBE growth of GaAs photocathodes for the Cornell ERL photoinjector and effect of roughness on emittance	2
Open Discussion or Contributed Talks	2
Surface characterization of GaAs photocathodes and high current operation experience	2
Reduction of emittance from metals to less than thermal	2
Growth and operation of Pb/Nb photocathodes in SRF gun	2
Cathode characterization and analysis at DESY	2
Workfunction and Quantum Efficiency studies on Cesium Telluride	2
Open Discussion or Contributed Talks	3
Monte Carlo Scattering Corrections to Moments-Based Emission Models	3
KEK	3
Models of effect of roughness on emittance	3
Cs surface effects	3
One-step model of photoemission and extensions to the three-step model	3

Monte-Carlo simulations of Charge transport and photoemission from GaAs photocathodes	3
Modeling Electron Emission from Diamond-Amplified cathodes	3
??	4
Open Discussion	4
Redesigning Cs ₂ Te: Workfunction Lowering and Quantum-Efficiency Preservation via Acetylation	4
Plasmonic photocathodes	4
Surface science techniques	4
Nano-cavity plasmonic photocathodes	4
Grating based plasmonic photocathodes	4
Genetic optimization technique for bandgap tuning	4
Open Discussion or Contributed Talks	4
Update on the photocathode wiki-project	5
Cathode production and supply, useful things to track, photocathode website	5
LBNL gun as a test venue for various cathodes	5
Open Discussion for Future Collaboration	5
Outlook and 2-year plans from each group (1 slide in advance)	5
Summary of the workshop	5
Open Discussion for Future Collaborations	5
Development of high performance photocathodes for microscopy and accelerators	5
DMD-Based Quantum Efficiency Mapping and Self-Healing of Hybrid Diffuser Dispensers	6
Open Discussion or Contributed Talks	6
Open Discussion	6
Open Discussion or Contributed Talks	6
Modeling the Resupply, Diffusion, and Evaporation of Cesium Based Dispenser Photocathodes	6
Electron effective mass: Emittance and efficiency	6
Operation of the High-Charge PHIN RF Photoinjector with Cs ₃ Sb Cathodes	6
Status OF CsBr Photocathodes	7

Photocathodes for Rossendorf SRF gun	7
German-Russian collaboration on high-brightness photocathodes	7
Measurements and modeling of space charge assisted photoemission at PITZ	7
Nanostructured Photoelectron Sources for Electron Beamlet Array Generation	8
High Aspect Ratio Si Photoelectron Emitter Arrays	8
K2CsSb cathode tests at JLAB	8

Session 1 - Workshop Welcome, Reviews / 0

Workshop Welcome

Session 1 - Workshop Welcome, Reviews / 1

Review of recent European Cathode Workshop

Session 1 - Workshop Welcome, Reviews / 2

Review of recent U Chicago photocathode/detector workshop

Session 1 - Workshop Welcome, Reviews / 3

Memories of the previous P3 workshop

Session 2 - New significant developments and relevant measurements / 4

Measurements of transverse momentum of photoelectrons from metals and alkali antimonide semiconductors

Session 2 - New significant developments and relevant measurements / 5

Measuring the growth of alkali antimonides using in-situ XRD and x-ray reflectivity

Session 2 - New significant developments and relevant measurements / 6

Open Discussion or Contributed Talks

Session 2 - New significant developments and relevant measurements / 7

Measurement of the chemistry and growth of alkali antimonides using in-situ AFM and XPS

Session 2 - New significant developments and relevant measurements / 8

Fabrication, characterization and use of alkali antimonides in a dc gun

Session 2 - New significant developments and relevant measurements / 9

MBE growth of GaAs photocathodes for the Cornell ERL photoinjector and effect of roughness on emittance

Session 2 - New significant developments and relevant measurements / 10

Open Discussion or Contributed Talks

Session 2 - New significant developments and relevant measurements / 11

Surface characterization of GaAs photocathodes and high current operation experience

Session 2 - New significant developments and relevant measurements / 12

Reduction of emittance from metals to less than thermal

Session 2 - New significant developments and relevant measurements / 13

Growth and operation of Pb/Nb photocathodes in SRF gun

Session 2 - New significant developments and relevant measurements / 14

Cathode characterization and analysis at DESY

Session 2 - New significant developments and relevant measurements / 15

Workfunction and Quantum Efficiency studies on Cesium Telluride

Session 2 - New significant developments and relevant measurements / 16

Open Discussion or Contributed Talks

Session 3 - Photocathode physics I: new insights in theory and modeling / 17

Monte Carlo Scattering Corrections to Moments-Based Emission Models

18

KEK

Session 3 - Photocathode physics I: new insights in theory and modeling / 19

Models of effect of roughness on emittance

20

Cs surface effects

Session 3 - Photocathode physics I: new insights in theory and modeling / 21

One-step model of photoemission and extensions to the three-step model

Session 3 - Photocathode physics I: new insights in theory and modeling / 22

Monte-Carlo simulations of Charge transport and photoemission from GaAs photocathodes

Session 3 - Photocathode physics I: new insights in theory and modeling / 23

Modeling Electron Emission from Diamond-Amplified cathodes

24

??

Session 3 - Photocathode physics I: new insights in theory and modeling / 25

Open Discussion

Session 4 - Photocathode physics II: towards photocathode material engineering / 26

Redesigning Cs₂Te: Workfunction Lowering and Quantum-Efficiency Preservation via Acetylation

27

Plasmonic photocathodes

Session 4 - Photocathode physics II: towards photocathode material engineering / 28

Surface science techniques

Session 4 - Photocathode physics II: towards photocathode material engineering / 29

Nano-cavity plasmonic photocathodes

Session 4 - Photocathode physics II: towards photocathode material engineering / 30

Grating based plasmonic photocathodes

31

Genetic optimization technique for bandgap tuning

Session 4 - Photocathode physics II: towards photocathode material engineering / 32

Open Discussion or Contributed Talks

Session 5 - Future outlook and collaborations / 33

Update on the photocathode wiki-project

Session 5 - Future outlook and collaborations / 34

Cathode production and supply, useful things to track, photocathode website

Session 5 - Future outlook and collaborations / 35

LBNL gun as a test venue for various cathodes

Session 5 - Future outlook and collaborations / 36

Open Discussion for Future Collaboration

Session 5 - Future outlook and collaborations / 37

Outlook and 2-year plans from each group (1 slide in advance)

Session 5 - Future outlook and collaborations / 38

Summary of the workshop

39

Open Discussion for Future Collaborations

Session 2 - New significant developments and relevant measurements / 40

Development of high performance photocathodes for microscopy and accelerators

Session 2 - New significant developments and relevant measurements / 41

DMD-Based Quantum Efficiency Mapping and Self-Healing of Hybrid Diffuser Dispensers

Session 3 - Photocathode physics I: new insights in theory and modeling / 42

Open Discussion or Contributed Talks

Session 4 - Photocathode physics II: towards photocathode material engineering / 43

Open Discussion

Session 5 - Future outlook and collaborations / 44

Open Discussion or Contributed Talks

Session 3 - Photocathode physics I: new insights in theory and modeling / 45

Modeling the Resupply, Diffusion, and Evaporation of Cesium Based Dispenser Photocathodes

Session 4 - Photocathode physics II: towards photocathode material engineering / 46

Electron effective mass: Emittance and efficiency

Session 2 - New significant developments and relevant measurements / 47

Operation of the High-Charge PHIN RF Photoinjector with Cs₃Sb Cathodes

Author: Christoph Hessler¹

Co-authors: Eric Chevallay¹; Steffen Doebert¹; Valentin Fedosseev¹

¹ *CERN, Geneva, Switzerland*

Corresponding Author: christoph.hessler@cern.ch

Session 4 - Photocathode physics II: towards photocathode material engineering / 48

Status OF CsBr Photocathodes

Author: Juan Maldonado¹

Co-authors: Ann Trautwein¹; David Dowell¹; Jeffrey Corbett¹; Piero Pianetta¹; Sam Park¹; William Clay²

¹ *SLAC National Accelerator Laboratory*

² *Stanford University*

Corresponding Author: jrmald01@slac.stanford.edu

Session 2 - New significant developments and relevant measurements / 49

Photocathodes for Rossendorf SRF gun

Author: Rong Xiang¹

Co-authors: Andre Arnold¹; Jochen Teichert¹; Peter Michel¹; Petr Murcek¹

¹ *Helmholtz-Zentrum Dresden-Rossendorf*

Corresponding Author: r.xiang@hzdr.de

Session 5 - Future outlook and collaborations / 54

German-Russian collaboration on high-brightness photocathodes

Authors: Martin Schmeißer¹; Thorsten KAMPS¹

¹ *Helmholtz Centre Berlin*

Corresponding Author: martin.schmeisser@helmholtz-berlin.de

Session 3 - Photocathode physics I: new insights in theory and modeling / 55

Measurements and modeling of space charge assisted photoemission at PITZ

Author: Mikhail Krasilnikov¹

¹ DESY

Session 4 - Photocathode physics II: towards photocathode material engineering / 56

Nanostructured Photoelectron Sources for Electron Beamlet Array Generation

Authors: Michael Swanwick¹; Richard Hobbs¹

Co-authors: Franz Kaertner ¹; Karl Berggren ¹; Luis Velasquez-Garcia ¹; Phillip Keathley ¹; William Graves ¹; Yujia Yang ¹

¹ *Massachusetts Institute of Technology*

Corresponding Author: rhobbs@mit.edu

Session 4 - Photocathode physics II: towards photocathode material engineering / 57

High Aspect Ratio Si Photoelectron Emitter Arrays

Session 2 - New significant developments and relevant measurements / 58

K₂CsSb cathode tests at JLAB
