

# ACHIP@ARES

- ARES normal conducting S-band linac commissioning has been successful and continues towards sub-fs bunches
  - Almost all design electron beam parameters demonstrated
  - Comprehensive accelerator R&D program, including external users
  - PolariX transverse deflecting structure commissioning starting Q1 2023
- Dielectric laser acceleration experiment
  - Spatial and temporal overlap of laser and electron beam has been established on dielectric laser accelerator
  - Will be continued in coming months
